UCBOS®

Zero Code Business and AI Solutions

Buy as SaaS - Enhance as PaaS - Govern Your Data

Next Gen Zero Code Platform

A technology that brings **Innovation to On-Prem** and **Agility to Cloud applications** by overcoming business cross-functional barriers through "NEW" Zero Code solutions critical for current and future business.

Why UCBOS

Innovation Freedom

Gain Business Smart Solutions with Data Ownership and extension flexibilities for Agile Enterprise Needs

Achieve 10x Faster Solutions to Market

A platform that holds the DNA to compose enterprise real-time visibility, on-demand multi-directional orchestration, what-if scenario planning, and AI Prediction in an agile, composable approach

Achieve Zero Technical Debt

A technology which does not generate any LINE OF CODE that is dependent on current or future enterprise data or connectors or functionality or API or ERP used by the customer

Our Solutions

SCMPaaS

- SCM Command Center - Procurement - Supplier Portal - Appointment - Yard - Dock Management - Material Inventory Management - Logistics & Fulfillment & More

AIPaaS

- Lead Time Manufacturing - Lead Time Procurement - Lead Time Order Fulfillment Prediction
- Dynamic Slotting Prediction
- Demand Forecasting Prediction Customer Churn Prediction & More

iPaaS & oPaaS

- B2B Ecosystem Integration
- API Management
- Routing & Orchestration
- Operational Database
- Semantic Data Model & More

Vendor Accelerators

- Manhattan Upgrade Accelerators
- Oracle Gap Enrichment
- SAP Extensions

UCBOS®

Take Control Back from Rigid SaaS with a Technology Agnostic Platform

UCBOS smartly connects disparate ecosystems, data types, and formats in real-time, evaluates the business drivers, and triggers new strategic solutions for improved business outcomes through a 100% Configurable zero code platform. UCBOS's unique selling proposition is real-time business visibility with gears to implement alternate strategies based on new data insights, AI modeling, and on-demand multi-directional orchestration across the value chain without a single line of code eliminating technical debt.
